## Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets with the Wi-Fi air interface have clear and effective disclosure that the handset has not been tested for hearing aid compatibility with respect to its Wi-Fi voice operation? Yes

Explain:

## Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <https://www.cellularsouth.com/hac/index.html>

Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Cellular South's compliant handset models are publicly identified for consumers and audiologists. Compliant handset models are made available through Cellular South's retail locations, website and from Telesales. Compliant models are listed on the company's web site, where functional features and the M and T rating is listed for each device, along with frequently asked questions. Cellular South's retail salespeople are trained to assist with complaint digital wireless phones. Written materials, pamphlets and other promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Consumers are given a 30-day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

## Methodology for Functionality Levels

Advanced - (MSRP - at least \$300) Phones classified as "advanced" generally offer enhanced features such as a higher-quality camera, multiple Bluetooth® profiles, Internet access, high-speed processing, a touch-screen interface, e-mail or a Windows Mobile® operating system.

Average - (MSRP - \$150 - \$299.99) Phones classified as "average" generally offer lower-quality cameras (compared to advanced models), handsfree and headset Bluetooth® profiles, expandable memory, larger phone book capacity, an enhanced color display or increased talk time (over basic models). However, these phones offer fewer features than advanced models.

Basic - (MSRP - \$149.99 or less) Phones classified as "basic" offer the necessary wireless features and may have a lower-quality camera and limited Bluetooth® or Internet capabilities. Typically, these phones offer smaller phone book capacity and average talk time. Most of these phones are generally larger in size compared to more advanced models and lack features such as MP3 players, expandable memory and download capabilities.
